

PHARMACOVIGILANCE INTERNSHIP – TASK 2

ADR Reporting & Documentation – Concise Analysis

1. Case Summary

A 34-year-old female (A.K.) received amoxicillin 500 mg orally three times daily for acute bacterial sinusitis. On 03/03/2026 she developed generalized itching and a pruritic rash. Amoxicillin was withdrawn and cetirizine was given for symptomatic relief. The reaction resolved by 06/03/2026. No rechallenge was performed.

2. Key Form Fields

Field	Fictional case entry
Patient	A.K.; 34 years; female; 62 kg
Reaction	Generalized pruritic rash and itching; onset 03/03/2026; recovery 06/03/2026
Suspected medicine	Amoxicillin 500 mg PO TID; 01/03/2026–03/03/2026; bacterial sinusitis
Management	Drug withdrawn; cetirizine for symptomatic relief
Seriousness / outcome	Non-serious; recovered
Rechallenge	Not performed
Concomitant medicines	None reported
Causality	Probable/Likely
Reporter	Dr. Meera Sharma, Clinical Pharmacist (Fictional)

3. Reporting Principles Demonstrated

The exercise uses patient initials, records reaction onset and outcome, identifies the suspected medicine and therapy dates, documents action taken and rechallenge status, and avoids inventing unavailable clinical information.

4. Declaration

All patient details, clinical information, dates, reporter identity, contact details and signature in this exercise are fictional and created only for educational portfolio practice. No real patient or reporter data are represented.
